Projects

Issad Income Tax

Description: Developed a web application using React.js for a tax preparation and accounting firm, Issad Income Tax. The application includes features such as contact forms, tax return status checking, information about services, and a Google Map integration for location.
Technologies: React.js, React Router, EmailJS, Styled Components.
Responsibilities: Designed and implemented various components, including the navigation bar, contact forms, and service information sections.
Key Achievements: Successfully integrated email functionality for contact forms and provided a user-friendly interface for checking tax return status.
